

Sedibelo  
Investments Holding

Our vision is to be a global African diversified industrial company

Since 2010

Founded by the Matshego brothers in 2010, Sedibelo Investment Holdings Group has diversified its portfolio and now participates in a broad spectrum of activities in the mining sector

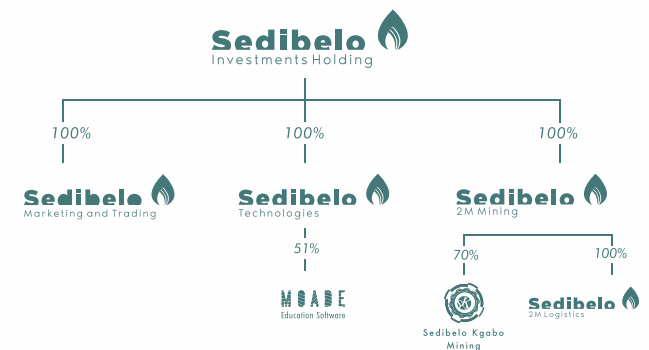

## About Our Company

Sedibelo Investments Holding (SIH) was founded in 2010 by two Matshego brothers Tshiamo and Kgolagano aka "Khuli", who are seasoned entrepreneurs with vast business experience. SIH is a diversified group with interest in mining services, hard commodity trading and information technology.

The group currently employs over 115 people, most of whom are from local communities in which we operate in.

The group's current footprint is South Africa, but we aim to expand into the DRC and Zambia to tap into strategic minerals that the two countries have in abundance.

### GROUP STRUCTURE

### OUR VISION

To be a global African diversified industrial company

### OUR MISSION

Developing businesses that deliver good returns, are sustainable to the environment and have social impact to communities around them

### OUR VALUES

Trust  
Relationships  
Solutions focused  
Customer satisfaction

## Our Leadership

The Matshego brothers are both seasoned entrepreneurs with hands-on operational and management experience in shipping, road freight, trading, marketing and sales within the energy and mineral sectors.

The duo's ability to link their entrepreneurial and strategic vision has firmly established Sedibelo Investments Holding as a serious contender in the mining services sector.

### Executive Chairman **Tshiamo Matshego**

Tshiamo is driving the group's growth in the coal sector, both in trading and other broader initiatives in information technology, including the development of proprietary systems for SKM. He is also responsible for the group's overall strategy development and implementation, financial management and corporate affairs.

He holds a BCom IT (UCT) and an ND Electrical Engineering LC (Cape Techikon). His resumé includes operational and managerial experience in the trucking, aviation, mining and IT sectors, this expertise, coupled with extensive sales in his role as public sector software sales leader for IBM serves him well in his current role.

### Executive Director **Khuli Matshego**

Khuli has started ventures in coal production, rough diamond trading, marketing, shipping and logistics (energy and mineral products). He is responsible for the strategy and management of SKM and delivering on the company's vision.

He holds a Bachelor in Business Science Economics (Hons) degree from UCT, a diploma in Import and Export Management from the Johannesburg Chamber of Commerce and a Foundation Diploma in Port Agency from the Institute of Chartered Ship Brokers in the UK.

# Sustainability

We realise that to create a sustainable business – our values need to be relatable and aligned with our group strategy. Our values underpin our goal of positively impacting on the environment and communities in which we operate. We believe that the only way in which we can bring our values, vision, and mission to life is to hold our entire team accountable to the three pillars of our sustainability strategy.

## ENVIRONMENTAL

Strive to minimise our carbon footprint through solutions-driven procurement of state-of-the-art equipment with the lowest gas emissions and highest energy ratings.

## SOCIAL

Build a competent, resilient and representative team through ongoing training and development and employment strategies focused on creating opportunities for women in operational functions.

## CREATING VALUE

Ensure job creation and enterprise development at local level and create value through activities such as;

- participation in local employment forums as a means of identifying and employing job seekers best suited to our operations
- ongoing support of local businesses through our Enterprise Development initiatives
- investing in the communities we serve
- upholding the highest standard of corporate governance

2M Mining

2M Logistics

**2M Mining**, offers end-to-end mining services for both surface and underground mining environments. SKM and 2M Logistics are two divisions operating within this environment and boasts experienced and talented core teams.

**SKM** provides down-the-hole drilling of blast holes in open pit operations. SKM has the equipment and personnel to drill in both hard (platinum, manganese, iron ore) and soft rock (coal) operations. Our production teams are supported by an engineering team comprising engineers, technicians and artisans with proven experience in maintaining and repairing the leading equipment brands. SKM has a strategic partnership with Sandvik Mining, a Tier 1 original equipment manufacturer of surface and underground trackless mining machinery from Finland, that ensures comprehensive after-sales support.

**2M Logistics** provides coal haulage and logistics services both on and off the mine.

The Industrial Development Corporation (IDC) is our funding partner and we also collaborate with Overlooked Group which is a diversified black-owned and operated mining group with underground and open-cast mining operations. Through these partnerships/collaborations, we are able to respond and support our client's needs.

Marketing and Trading

**Sedibelo Marketing & Trading** supplies hard commodities and related solutions to the industrial sector. We supply over 30 000 tons of sized coal to the industrial sector every month. A key market segment is the cement industry, of which Lafarge Cement and AfriSam Cement are major clients.

Sedibelo Marketing & Trading has established itself as a reliable and trusted supplier of choice for quality coal in the cement industry and is steadily growing its coal supply market base to other industries. We are expanding our product range to include the marketing of copper, gypsum and scrap metals (aluminum, zinc).

Technologies

**Sedibelo Technologies** develops and maintains bespoke technology solutions for the group. Our team has developed a mining solution around health and safety and engineering maintenance. Although the solution was specifically developed to streamline operational efficiencies within our group of companies, it has proven to be a solution that we are currently packaging into a commercial product.

Sedibelo Technologies owns 51% of MOADE Education Software, a software solutions company that has designed and developed SchoolLMS, an e-learning software platform for schools and higher learning institutions. The software is supported by the Centre for Public Service and Innovation (CPSI), and through this partnership the software is being piloted in eight schools across South Africa. We intend to market this suite of products in the country and beyond.
